

HA GIA PHUC

+(84) 846 2526 39 | Phucha2639@gmail.com | github.com/Giaphuc713
DOB: 2004 | Gender: Male

EDUCATION

- **University of Science, Vietnam National University Ho Chi Minh City (HCMUS)** 2022 – 2026
- **Major: Information Technology (Information Systems)** **GPA: 7.96 / 10**

SKILLS

- Basic technical drawing interpretation.
- Understanding of 2D views and dimensions.
- Spatial visualization and attention to drawing accuracy.

GRADUATION PROJECT - AI AGENT STUDENT LEARNING ASSISTANT

Tech Stack: LightRAG, MinerU, Knowledge Graph, Redis, GraphQL, Docker, Python

- Role: AI Developer – Team size: 4
- Implemented entity deduplication and sameAs entity linking to resolve duplicate entities across knowledge sources and improve Knowledge Graph consistency.
- Developed section-based document chunking to preserve document structure and contextual meaning, improving retrieval quality for LLM queries.
- Developed the web UI and integrated it with the LightRAG-based architecture to support AI Agent interactions and knowledge retrieval.

TECHNICAL PROJECTS

Video Generation Platform – Front-end Developing and Testing 03/2025 – 07/2025

Tech Stack: ASP.Net Core, React, AI APIs, SQL Server, Jira, GitHub

- A platform that creates videos from user content, with direct publishing to YouTube, TikTok, and Facebook, and **VNPay** integration for premium account upgrades.
- Combined audio and images into complete video outputs.
- Developed front-end UI with ReactJs
- Tested REST APIs and verified request/response data and status codes.
- Used SQL Server queries to check data during testing and investigate issues.
- Created and executed test cases, reported bugs, and retested fixes.
- GitHub: github.com/mquangcao/AIGenVideo

Real-time Fraud Detection System – Data Analytics Project 10/2025 – 01/2026

Tech Stack: Python, Kafka, PySpark, Airflow, Hadoop HDFS, Power BI, Docker

- Architected an end-to-end streaming data pipeline using Dockerized Apache Kafka and PySpark to ingest and process live POS (Point of Sale) transactions with sub-second latency.
- Developed custom Python simulators integrated with real-time exchange rates to stream complex financial data into Kafka topics.
- Orchestrated automated ETL workflows using Airflow to aggregate data into HDFS, powering Power BI dashboards for instant fraud mitigation.
- Github: github.com/Giaphuc713/fraud-detection.git

Forum Platform –Backend Developing and Testing 12/2025 – 04/2026

Tech Stack: Java, Spring Boot, Next.js, TypeScript, PlayWright, Tailwind CSS, PostgreSQL/Supabase, Claude, OAuth2

- A Reddit-inspired community forum platform with features for community management, post sharing, comments, and content discovery.
- Designed test case for core features (login, register, CRUD comments, posts)
- Integrated automated tests using **PlayWright** into CI/CD pipelines and generated tests reports to detect regressions early.
- GitHub: github.com/forum-platform

SOFT SKILLS

- Good communication and teamwork
- Detail-oriented and responsible
- Proactive and self-motivated learner
- Strong analytical and problem-solving skills

CERTIFICATIONS

- **TOEIC Speaking & Writing:** 250 *Jun 2025*
- **TOEIC Listening & Reading:** 650 *Dec 2024*
