

HA GIA PHUC

Software Developer & QA/QC Engineer

+(84) 846 2526 39 | Phucha2639@gmail.com | github.com/Giaphuc713

DOB: 2004 | Gender: Male | Thu Duc, Ho Chi Minh City

SUMMARY

Front-end Developer with around one year of experience, interested in QA/QC and looking to transition into Software Testing. Gained experience writing SRS documents and managing tasks through Jira in several university projects. Hoping to have the opportunity to learn from experienced professionals and develop skills in Software Testing.

EDUCATION

- | | |
|--|---------------------|
| • University of Science, Vietnam National University Ho Chi Minh City (HCMUS) | 2022 – 2026 |
| • Major: Information Technology (Information Systems) | GPA: 3.4 / 4 |

EXPERIENCE

Daoukiwoom Innovation Vietnam – Frontend Developer and Testing Aug 2025 – July 2026

- Participated in a **cross-functional team of 8 members** to develop a **securities trading system**, providing stable and user-friendly financial IT solutions for the Southeast Asian market.
- Operated under an **Agile framework**, managing tasks via **Jira** and streamlining version control through **Bitbucket**.
- Built and integrated backend services using **JavaScript(NodeJs)**, **RESTful APIs**, focusing on API routing, service-to-service communication, authentication, authorization, and scalable backend design.
- Learned and applied **SOLID principles** to maintain a clean, decoupled, and maintainable architecture.
- Write testcase for each deployment issue
- Gained practical experience in **containerization with Docker** and automated **CI/CD pipelines via GitLab CI/CD**.

SKILLS

- **Programming Languages:** JavaScript/TypeScript, Python, C++, Java, SQL
- **Frontend:** React, Redux Toolkit, Tailwind CSS, HTML/CSS
- **Backend:** Node.js (Express), Java (Spring Boot)
- **Databases:** Microsoft SQL Server, MySQL, MongoDB, PostgreSQL
- **DevOps & Tools:** Git, GitHub, Docker (basic), CI/CD (basic), RESTful APIs

KEY AI & RESEARCH PROJECTS

AI Agent Student Learning Assistant 01/2026 – Present

Graduation Thesis – Role: AI Developer – Team size: 6

- Implemented entity deduplication and sameAs entity linking, resolving duplicate entities across knowledge sources to improve KG consistency.
- Developed section-based document chunking to preserve semantic structure and improve retrieval quality.
- Spearheaded multi-agent orchestration (memory & query analysis agents) and document-tailored prompt flows for structured reasoning.

TECHNICAL PROJECTS

Video Generation Platform – Full-stack Developer 03/2025 – 07/2025

Tech Stack: ASP.Net Core, React, Redux, Tailwind CSS, AI APIs, MSSQL, Entity Framework

- A platform that creates videos from user content, with direct publishing to YouTube, TikTok, and Facebook, and **VNPay** integration for premium account upgrades.
- Collected data from Wikipedia, YouTube, and DeepSeek APIs.
- Combined audio and images into complete video outputs.
- Published videos to YouTube and Facebook platforms.
- Tracked and analyzed video performance metrics from YouTube.
- Integrated **VNPay payment gateway** to process VIP account upgrades.
- GitHub: github.com/mquangcao/AIGenVideo

Library Management System – Full-stack Developer

04/2024 – 07/2024

Tech Stack: MySQL, Node.js, HTML/CSS, Docker, Git

- An online library system for managing book inventory, sales, and online ordering.
- Designed a user-friendly interface to enhance user experience.
- Developed the book-selling feature with online ordering.
- Implemented inventory and monthly sales reports for management.
- Utilized **Docker** to optimize deployment across multiple environments.
- Implemented **JWT-based** role authorization (user/admin).
- GitHub: github.com/blue-management

- Forum Platform** – Full-stack Developer

12/2025 – 04/2026

Tech Stack: Java, Spring Boot, Next.js, TypeScript, PlayWright, Tailwind CSS, PostgreSQL/Supabase, Claude, OAuth2
- A Reddit-inspired community forum platform with features for community management, post sharing, comments, and content discovery.
 - Built RESTful APIs using **Java** and **Spring Boot** for authentication, post creation, search, filtering, comments, and community membership.
 - Developed a responsive and user-friendly forum interface using **Next.js**, **TypeScript**, and **Tailwind CSS**.
 - Implemented infinite scrolling and developed custom React hooks for optimized API data fetching.
 - Integrated automated tests using **PlayWright** into CI/CD pipelines and generated tests reports to detect regressions early.
 - Created functional, negative, regression, and integration test scenarios to validate API status codes, response payloads
 - GitHub: github.com/forum-platform

CERTIFICATIONS
